

ABDUL RAHMAN BIN MOHAMAD SABRY

Kuala Lumpur, Malaysia | amansab96@gmail.com | [019-9938955](tel:019-9938955) | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Backend / Full-Stack Developer with 3.5+ years building insurance technology platforms using Python, Django, Django REST Framework, React, PostgreSQL, Docker, and AWS. Experienced across backend APIs, React SPAs, WebSocket features, deployment integration, automated testing, and AI-assisted developer tooling. Former investment analyst with a finance background and a record of building automation that reduces manual processing.

CORE SKILLS

Backend: Python, Django, Django REST Framework, PostgreSQL, Celery, REST APIs, third-party integrations | Frontend: JavaScript, TypeScript, React, MUI, TanStack, HTML, CSS | Cloud/DevOps: AWS, Docker, Linux, Nginx, Git | Testing/Tooling: Pytest, Playwright, WebSockets, Django Channels, AI-assisted engineering workflows | Finance/Data: Excel VBA, PowerQuery M, financial analysis

PROFESSIONAL EXPERIENCE

Tigerlab — Backend / Full-Stack Developer

Kuala Lumpur, Malaysia | Jul 2022 – Present

- Lead backend and full-stack development for client-facing insurance web applications across Django APIs, React SPAs, deployment integration, testing, code review, and architecture decisions.
- Delivered production features across product configuration, rating-factor management, lookup-table editing, formula workflows, bulk calculations, version comparison, rating-run history, documents, emails, and third-party integrations.
- Earlier role: built customised Django insurance features, redesigned refund-management workflows integrating Stripe and Adyen, resolved 270+ reported client issues, added Pytest coverage, and integrated services such as Postmark.

Selected project work within this role:

Insurance Rating Platform — *Django, DRF, React, TypeScript, MUI, TanStack, WebSockets, Playwright*

- Owned a rating-engine backoffice used to configure insurance products, rating factors, lookup tables, formulas, premium calculations, bulk calculations, and rate adjustments.
- Built both the original Django/Tailwind/Alpine/HTMX UI and the later React 18 SPA backed by Django REST Framework APIs, then set the decommission strategy for duplicated legacy UI.
- Implemented React + TypeScript frontend patterns using MUI, TanStack Router/Query, token auth/CSRF handling, route loaders, and feature-first modules.
- Added backend support for a Django-served static SPA, WebSocket assistant flows, version-comparison APIs, validation/error handling, audit-friendly persistence, and automated tests.

International Insurance Product Launch — *Django, React, integrations, localisation, deployment planning*

- Helped launch a regulated insurance product in a new market on a multi-tenant Django + React platform, covering product setup, company-data/address-lookup integrations, localisation, tax handling, documents, emails, and rollout planning.
- Investigated deployment blockers across frontend delivery and infrastructure handoff points, separating repo-fixable issues from host-access requirements and documenting correctness traps across client/product payloads.

AI-Assisted Engineering Toolkit — *AI tooling, Git worktrees, automation, review workflows, DevEx*

- Built internal tooling that turns engineering tickets into structured plans, agent tasks, worktree setup, merge reviews, and deployment audits.
- Standardised task planning, branch/worktree conventions, parallel coding-agent orchestration, review checkpoints, and read-only investigation workflows with citation discipline.

PERKESO — Analyst / Management Associate

Kuala Lumpur, Malaysia | Sep 2019 – Jul 2022

- Built an auto-export process using PowerQuery M and Excel VBA to move 10,000+ transaction records across asset classes into departmental databases and automate back-office transaction reports.
- Created and maintained spreadsheet-based reporting tools for portfolio analysis, management reporting, and recurring investment workflows, reducing manual data preparation.
- Worked with structured financial datasets, reconciliation steps, and stakeholder reporting requirements before transitioning into software development.

CERTIFICATIONS

AWS Certified Cloud Practitioner | Advanced React — Meta/Coursera | React Basics — Meta/Coursera | AI for Everyone | Anthropic Education: Introduction to Agent Skills, Claude with the Anthropic API, Claude Code in Action, Introduction to Model Context Protocol

EDUCATION

The University of Manchester — BA (Hons) Accounting and Finance, Social Sciences | 2016 – 2019

MARA Ketengah International College — CIE A-Level: 4A | 2014 – 2016

MRSM Muar — SPM: 8As 1B+ | 2012 – 2013

LANGUAGES & INTERESTS

Native Malay; fluent English. Interests include software tooling, cloud architecture, AI-assisted development, investment, gaming, and gym.
